## BASIC-ABSTRACT:

A cosmetic prepn., esp. a moisturising skin lotion contg. an oil-in water emulsion contg. moisturising agents, an emulsifier having mainly hydrophilic gps. and usual additives and without stabilisers, it contains not more than 1% emulsifier and is prepd. immediately before use by shaking. The prepn. esp. consists of a) an aq. phase contg. 39.25% demineralised water, 0.10% hyaluronic acid, 20.00 % mannuronic acid silanol, 13.00% plant extract and 2.00% D-phanthenol, b) an oil phase contg. 20.00% avocado oil 5.00% vitamin E acetate, 0.25% scent and 0.30% preservative and c) 0.10% trilaneth-4-phosphate as emulsifier. A sun tan lotion can be obtd. by adding a light absorber to the prepn..

USE/ADVANTAGE - The easy application of an oil-in-water emulsion is retained combined with the protection and caring effect of a water-in-oil emulsion while avoiding use of detrimental additives.

ABSTRACTED-PUB-NO:

## EP 258558B EQUIVALENT-ABSTRACTS:

Skin hydrating product based on an unstable O/W (oil-in-water) emulsion with hydrating active agents, an emulsifier with mainly hydrophilic groups and further additives, characterized in that the product is free from emulsion stabilizers, the emulsifier is added in a proportion of up to 1% and that the unstable O/W emulsion to be applied initially in the form of an aqueous phase and an O/W emulsion containing fatty, mineral or essential oils in separate phases, is prepared directly prior to the use of the product by shaking.
